

Economic Growth Region 10

Statistical Data Report for February 2016, Released April 2016

Regional and State Unemployment (seasonally adjusted)

Regional and state unemployment rates were little changed in February. Twenty-two states had unemployment rate decreases from January, eight states had increases, and 20 states and the District of Columbia had no change, the U.S. Bureau of Labor Statistics reported. Thirty-seven states and the District of Columbia had unemployment rate decreases from a year earlier, 10 states had increases, and three states had no change. The national jobless rate, 4.9 percent, was unchanged from January and was 0.6 percentage point lower than in February 2015.

In February, no region had an unemployment rate significantly different from that of the U.S. Over the month, only the West had a statistically significant unemployment rate change (-0.1 percentage point). Significant over-the-year rate decreases occurred in all four regions: the Northeast (-1.0 percentage point), West (-0.9 point), South (-0.5 point), and Midwest (-0.3 point).

Economic Growth Region (EGR) 10

Clark, Crawford, Floyd, Harrison, Scott, and Washington Counties.

February 2016 Labor Force Estimates (not seasonally adjusted)

Area	Labor Force	Employed	Unemployed	Feb 2016 Rate	Jan 2016 Rate	Feb 2015 Rate

Women More Likely Than Men to Have Earned a Bachelor's Degree by Age 29

BUREAU OF LABOR STATISTICS, APRIL 13, 2016

Thirty-four percent of women born in the years 1980–84 had earned a bachelor's degree by age 29, compared with 26 percent of men. Among women and men born in 1980–84, 38 percent had attended some college or earned an associate degree by age 29. Twenty-four percent had earned a high school diploma or General Education Development (GED) credential.

Percent of people born in 1980–84 by their educational attainment at age 29

Within each racial and ethnic group examined, women were more likely than men to have earned a bachelor's degree. Thirty-nine percent of non-Hispanic White women had earned a bachelor's degree by age 29, compared with 31 percent of non-Hispanic White men. Twenty-one percent of non-Hispanic Black women had earned a bachelor's degree by age 29, compared were also more likely than men to have earned a bachelor's degree by age 29 (20 percent versus 14 percent).

Among men at age 29, Hispanics and non-Hispanic Blacks were nearly twice as likely as non-Hispanic Whites to have dropped out of high school. Women in each of the racial and ethnic groups were less likely than men to have dropped out of high school

About 36 percent of non-Hispanic Black men at age 29 were high school graduates who had not attended college. That compares with 31 percent of Hispanic or Latino men and 27 percent of non-Hispanic White men. About one in five Black, Hispanic, and White men had earned a regular high school diploma; Black men were more likely than Hispanic or White men to have earned a GED. Among 29-year-old women, 26 percent of Hispanics or Latinos were high school graduates who had not attended college. That compares with 22 percent of non-Hispanic Black women and 20 percent of non-Hispanic White women. Women in all three groups were about equally likely to have earned a GED.
